
Geometry, Integrability and Quantization

Aims and Scope

The series on Geometry, Integrability and Quantization continues the well received series of the Proceedings volumes of the International Conference on Geometry, Integrability and Quantization held in Varna, Bulgaria. These Conferences were organized around the general trend of application of geometrical ideas in Mechanics, Physics and Biology. The emphasis is on concrete applications and modern developments in the respective fields.

Editor: Ivailo M. Mladenov

Co-Editors: Vladimir Pulov (Varna) and Akira Yoshioka (Tokyo)

Associate Editors:
